SUMMARY

Automation Developer at AI Automation Labs with expertise in Python, web development, and workflow automation. Skilled in designing and implementing automation solutions to streamline processes, reduce manual effort, and improve efficiency.

Experienced with n8n, Frappe Framework, Flask, and API integration. Passionate about leveraging technology to deliver effective and impactful solutions.

EDUCATION

Mangalayan University

Pursuing Bachelor Computer Application
2024

Mpl Nehru High School & Junior College Tumsar

Completed class 12th with 67%(science)
2021-2022

Shri Gurudeo High School Ashti

Completed class 10th with 73.63%
2019-2020

TECHNICAL KNOWLEDGE

Tech Skills

Programming Languages:

- Python, C, HTML, CSS, JavaScript

Automation & Workflow Tools:

- n8n – Build automated workflows and integrate apps/services
- Make.com – Automate tasks and connect multiple platforms

Frameworks & Backend:

- Frappe Framework v15 – Build web applications using DocTypes, workflows, and APIs.
- Flask – Handles server-side logic managing user login, saving data to a database, or processing forms.
- APIs / REST APIs – Connect applications and automate data flows

Database:

MySQL & MariaDB

Competitive programming

- Active participation in CodeChef and AtCoder coding contests.
- Utilized Python and C programming languages to solve complex problems in Codechef's tech company contests.

SKILLS

- Ability to work under pressure.
- Confidence.
- Teamwork skill.
- Problem solving.

PROFESSIONAL EXPERIENCE

Media Automation Intern

Solysian Tech Private Limited

Duration: 5 Months

- Created and managed automation workflows using n8n
- Automated media-related and repetitive tasks using no-code tools
- Improved workflow efficiency by reducing manual processes
- Worked on real-time automation and process optimization

Frappe Framework: Completed training on the Frappe Framework. Learned to build web applications using DocTypes, workflows, and APIs. Worked on projects like Interview Management System during the training.

PROJECTS

- AI Web Agent – Lawwale (HTML, CSS, JavaScript, Python, n8n, Make.com): Developed a web-based AI agent to provide real-time legal guidance. Built interactive chat interface with dynamic messages, typing indicators, session management, and integrated automated response workflows ([code](#))
- Airplane Mode App (Frappe Framework): Developed a Frappe-based application for flight and airport management, including ticket tracking, crew management, and airport shop rentals. Implemented features like automated reminders, tenant tracking, and a web portal for shop inquiries ([code](#))
- Interview Management System (Frappe): Developed a Frappe-based application for managing candidate profiles, interview scheduling, and status tracking with dashboards and real-time notifications. ([Code](#))
- Library Management System(Frappe): Developed a Frappe-based application for managing articles, memberships, and transactions. Created custom DocTypes: Article, Library Member, Membership, Transaction, and Settings. ([Code](#))
- Kon Banega Crorepati (KBC)Project (Python): Successfully developed a project featuring question-answering and lifeline functionalities, showcasing programming capabilities. ([Code](#))
- Real-Time Weather Application Project (HTML, CSS and JavaScript): Developed a real-time weather application as part of a team project. The app features search functionality and displays current weather conditions and a 5-day forecast for any city worldwide. ([Code](#))
