Summary

Computer Science Engineering student with a 9.45 CGPA and strong foundation in Software Development, Data Structures, and Backend Systems. Proficient in Java, Python, REST APIs, and SQL, with internship experience in automation and API integration.

Education

Bharati Vidyapeeth College of Engineering <i>Bachelor of Technology in Computer Science Engineering-9.45 CGPA</i>	July 2023– July 2027 <i>Pune, Maharashtra</i>
Swami Vivekananda Hr.sec School <i>Class XII (PCM)– 92%</i>	2022 <i>Raipur, Chhattisgarh</i>
Swami Vivekananda Hr.sec School <i>Class X– 89%</i>	2020 <i>Raipur, Chhattisgarh</i>

Experience

Solysian Tech Pvt Ltd <i>Software Engineer - Automation Intern</i>	Aug 13, 2025 – Nov 14, 2025 <i>Remote / India</i>
* Engineered 8+ production-ready workflow automation pipelines using n8n, Webhooks, and REST APIs, automating repetitive business operations and reducing manual effort by 40%. * Designed and deployed an AI-driven chatbot system for automated customer interaction, processing 100+ queries per week with improved response efficiency. * Automated multi-channel communication workflows (WhatsApp, Email, LinkedIn) for lead management and outreach, improving operational productivity and response tracking. * Integrated multiple third-party APIs, AI tools, and webhook-based triggers to automate notifications, CRM updates, and business process flows.	

Projects

SkillSync-AI Job Gap Analyzer	2026
• Developed an AI-driven system to analyze resumes against job descriptions and identify skill gaps using NLP-based text parsing and keyword extraction techniques. • Built an automated resume analysis pipeline handling resume parsing, tokenization, and skill matching to generate personalized career insights. • Integrated AI APIs and workflow automation to provide real-time skill recommendations and job readiness evaluation. • Optimized text processing and similarity matching logic to improve analysis accuracy and scalability for multiple resume inputs. • Tech Stack: Python, NLP, REST APIs, AI APIs, Automation Tools	
EasyMed – AI-Enabled Healthcare Triage System	2025
• Engineered a full-stack healthcare triage platform for appointment scheduling, patient session tracking, and treatment workflow management. • Designed an AI-based health assessment module to analyze patient symptoms and generate dynamic medical reports and insights. • Developed RESTful APIs and interactive React dashboards to visualize treatment metrics, recovery trends, and analytical reports. • Optimized backend performance and database queries using Django and PostgreSQL for efficient patient data handling. • Tech Stack: Python, Django, React, PostgreSQL, REST APIs, AI/ML, JWT	

Technical Skills

Programming Languages: Java, python, JavaScript, C
Core Computer Science: Data Structures, Algorithms, OOP, DBMS, Operating Systems
AI & Automation: NLP, AI APIs, Workflow Automation, n8n, AI Integration
Web Development: React,Flask, HTML, CSS, REST APIs,PostgreSQL, MySQL, Springboot
Tools & Technologies: Git, GitHub, Linux, Postman, Jupyter, VS Code
Problem Solving: 150+ DSA Problems on LeetCode and codechef (Java)

Certifications

- * Oracle Foundations Associate Certification
- * NPTEL – Database Management Systems (Sep 2025) – 71%
- * NPTEL – Data Structures and Algorithms using Python (Sep 2025) – 61%
- * Udemy-Programming Using JavaScript
